

Hugo Miguel Grilo

Computer Engineering Student

Lisboa, Portugal · (+351) 936 582 019 · hugo.miguxl@gmail.com
Portfolio: gril0.github.io/portfolio · GitHub: github.com/HGril0

PROFILE

Computer Engineering student at Universidade Lusófona, interested in software development and problem-solving. Combines professional experience in process validation, anomaly analysis and functional testing with training in programming and software development in Java, JavaScript, C, Kotlin and HTML.

Analytical and rigorous profile focused on continuous improvement, with ease in learning new tools and adapting to demanding technical contexts.

PROFESSIONAL EXPERIENCE

Teleperformance · Lisbon, Portugal
Bloq.IT Project · IT Support

05/18/2026 · Current

- Remotely connect to smart lockers via command line for diagnostics and monitoring.
- Identify and resolve software, hardware and firmware failures on the equipment.
- Document issue resolutions in detail, ensuring traceability and continuity of support.

Teleperformance · Lisbon, Portugal
Google (Gemini) Project · Product Tester / Content Reviewer

07/2025 · 05/18/2026

- Performed pre-launch product testing, ensuring compliance with client-defined requirements and quality standards.
- Tested generative AI text interactions and image/video editing features, identifying inconsistencies and improvement opportunities.
- Verified final output quality, validating coherence, accuracy and adequacy of generated content.
- Controlled and mitigated false or misleading AI-generated information, in line with safety and quality criteria.

Teleperformance · Lisbon, Portugal
Uber Eats Project · Operations Support / Account Verification

11/2022 · 07/2025

- Verified documents and validated accounts, ensuring security, compliance and process integrity.
- Supported small and medium businesses on operational matters and best practices, contributing to more efficient platform use.
- Resolved cases with attention to detail, procedural compliance and focus on data reliability.

EDUCATION

Bachelor's Degree in Computer Engineering

Universidade Lusófona

09/2025 · Current

SKILLS
TECHNICAL

Java · JavaScript · C · Kotlin · HTML · Log analysis · Bug reporting · Process validation

LANGUAGES

Portuguese: Native

English: C2 listening, reading and writing; C1 spoken production; C2 spoken interaction

Teleperformance · Lisbon, Portugal

Blizzard Project · Trust & Safety / Operations Analyst

11/2021 · 11/2022

- Verified and validated documents, identifying signs of fraud and tampering.
- Investigated charges and transactions, analyzing cases and gathering evidence to support resolution.
- Analyzed game logs to detect errors in claim requests, reward allocation and anomalous behavior.
- Supported account recovery, ensuring compliance with security and authentication procedures.
- Collaborated on identifying, reporting and tracking bugs, contributing to continuous service improvement.
